

Assessment at Coppice

Intent

Coppice School offer a bespoke, personalised curriculum for all our students and we believe that we should assess children in the same personalised way. All assessment should be based on detailed observations and should then inform planning and provision.

Implementation

Using SmartRubric Goals, a bespoke assessment system developed for Coppice School; each student will have individual targets set for EHCPs, Maths, English plus Additional Areas.

Formative assessments will happen continually throughout the term and a summative assessment will happen in December, March and June. These summative assessments will be shared with parents and analysed by Pupil Progress Leads and SLT.

Each student will also be tracked on our subject tracker, which are related to our subject Progression Maps (bespoke to Coppice), to ensure teachers have a clear picture of where each child is working and their next steps

Impact

All students will be assessed on targets that are relevant and pertinent to their own strengths and areas of need. This will ensure teaching and learning meets the individual needs of all students to work towards accelerated progress for all.
